Welcome to the 6th of five posts (yes, this is the first encore) on improving parameter design in Tableau. So far we have discussed: how parameter formatting hasn't improved over time and gave one possible design solution and wrote a how-to on the topic.; the need for toggle buttons for boolean values and give an example.; the need for linked parameters-how parameters interact with each ...

[How to Build Multiple Select Parameters in Tableau ...](#)

I have seen a couple of different techniques in Power BI on creating these up and down arrows. I've seen blogs on using the down red arrow unicode (128315) combined with using the regular up arrow unicode (9650) and coloring that one green. When I've done it, the arrows seemed to be different sizes so I never really like this approach.

[Adding Up and Down Arrows to KPIs in Power BI | Tessellation](#)

This approach, however, shows us how many products meet our filter conditions. In the bottom left corner, you can see there are only 747 Product Names with sales equal or greater to \$500, compared to 1850 previously. ...
