Public policies can differ based on political affiliation or the type of challenge under consideration. Typically, officials create public policy in response to a problem and involve what the government will do to address the problem. Public policy can take the form of a new law, city ordinance, or government regulation.

To implement effective policies and interventions in fields such as public health or social policy, decision-makers need to consider what works, for whom, and under what circumstances [1, 2]. Questioning how interventions attain their stated goals is the heart of evidence-informed decision-making (EIDM), and is the main focus of methods to evaluate interventions.

Few issues actually make it onto policy agendas but those that do are often a result of public outcry, crises, and the lobbying efforts of important interest groups. Issues must become agenda items for policymaking bodies, like legislatures and administrative agencies, in order to proceed into the next stages of the policy process.
