Ancient history is the aggregate of past events from the beginning of writing and recorded human history and extending as far as post-classical history. The phrase may be used either to refer to the period of time or the academic discipline. The span of recorded history is roughly 5,000 years, beginning with the Sumerian cuneiform script, with the oldest coherent texts from about 2600 BC.

Archaeology is based on the scientific method. Archaeologists ask questions and develop hypotheses. They use evidence to choose a dig site, then use scientific sampling techniques to select where on the site to dig. They observe, record, categorize, and interpret what they find. Then they share their results with other scientists and the public.

The Ancient Greeks believed that there were four humors making up the body, and an imbalance in these would lead to both mental and physical illnesses and ailments. The balance of these humors would be affected by diet, location, age, climate and a range of other factors, and Ancient Greek medicine was based upon restoring the balance.
