Most chemistry curriculums are comprised of thick, boring textbooks that require a firm grounding in algebra and feature labs with chemicals that can strike fear in a homeschool parent's heart. Our chemistry curriculum is like nothing out there in the homeschool market (that I know of)! You don't need to know any higher level math to do it. You don't have to purchase a \$250 lab kit with ...

There are plenty of single-step reactions that have no intermediates at all. A typical first semester organic chemistry example is an SN2 reaction that involves no intermediate whatsoever (we'll see an example later in this post). You will always have a transition state though! Every reaction, no matter how simple it might be, has a ...
