[Family Ties And Aging Connidis](#)

Emotional Complexity of Relationships in Aging Families. Over the past 10 years, greater attention has been devoted to complexity in aging family relations deriving from conflicting emotions in intergenerational ties, conflicting reports about these ties based on generational perspective, and patterns of change in the perceived quality of marital relations.

[Aging and Family Life: A Decade Review](#)

For better and for worse, family relationships play a central role in shaping an individual's well-being across the life course (Merz, Consedine, Schulze, & Schuengel, 2009). An aging population and concomitant age-related disease underlies an emergent need to better understand factors that contribute to health and well-being among the increasing numbers of older adults in the United States.

Although siblings are a fixture of family life, research on sibling relationships lags behind that on other family relationships. To stimulate interest in sibling research and to serve as a guide for future investigations by family scholars, we review four theoretical psychologically oriented perspectives—(a) psychoanalytic-evolutionary, (b) social psychological, (c) social learning, and (d ...
